

Environmental Policy

The Leadership and Management of Allweld Nuclear and Industrial (ANI) is committed to protecting the environment through a graded approach to meeting the requirements of the Environmental Management System in line with ISO 14001:2026.

Within ANI's scope and context, as defined in the Integrated Management System Manual (ANI-PRO-040), we commit to:

- Protect the environment by preventing pollution, using resources responsibly, and safeguarding biodiversity and ecosystems.
- Support climate change mitigation and adaptation where practicable.
- Meet all applicable compliance obligations.
- Provide the resources needed to achieve and maintain an effective ISO 14001:2015 Environmental Management System (EMS).
- Continually improve the EMS to strengthen environmental performance.

ANI will strive to achieve this through integrated goals and objectives, consultation and participation with workers and service providers, planned decision-making, performance monitoring, and governance processes that support continual improvement of our management systems and processes.

This Environmental Policy is reviewed annually and is available to interested parties on request.

Mervyn Fischer
Chief Executive Officer
